EDUCATION

2025 - 2027 **emlyon business school** (Paris)
MSc in Data Science & Artificial Intelligence Strategy
Relevant Course : Business Intelligence, Python, SQL, Statistics, Data Science Applied, Operations & Decisions
Course Work : Exploratory data Analysis (EDA), Regressions Analysis, Statistical Analysis

2019 - 2023 **B.M.S COLLEGE OF ENGINEERING** (Bangalore)
B.E Telecommunication

PROFESSIONAL EXPERIENCE

2023 - Present **Divinark** **Founder** (Bangalore, India)

- Partnered with 7+ clients to provide custom web development, SaaS platforms, and AI-powered tools across 5+ industries.
- Orchestrated complex branding and 3D design projects to create digital experiences, increasing client user engagement by 25%.
- Contracted diverse technical solutions through streamlined project management to ensure high-quality and scalable outcomes.

2023 - 2025 **Nicheton/ Cohire** **Executive - Business Operations** (Bangalore, India)

- Advised on digital strategy and operations for CoHire.com SaaS platform to align technical execution with core business goals.
- Optimized digital presence of 3+ product lines to contribute a seamless, brand-consistent user experience.
- Dispensed data-driven insights to streamline workflows, resulting in a 15% increase in overall operational efficiency.

2022 - 2022 **Nicheton/ Cohire** **Web Developer Intern** (Bangalore, India)

- Engineered user-centric interfaces deploying React and Node.js to prioritize intuitive UX and high-performance architecture.
- Resolved 50+ technical site issues, including formatting errors and broken links, to maintain 99.9% platform uptime.
- Integrated emerging web standards to improve site scalability and maintain industry-leading development practices.

2020 - 2020 **PathaPadha** **Content Specialist** (Bhubaneshwar, India)

- Managed remote creation of high-quality brand content across 3+ digital platforms to drive audience engagement.
- Collaborated on 10+ confidential projects to ensure ethical representation and a consistent brand voice.
- Refined content distribution strategies to achieve a 20% improvement in total reach and brand impact.

SKILLS & INTERESTS

Languages: French (Beginner), English (fluent)
AI & Deep Learning- Neural Networks, Transformer, Supervised Fine-Tuning (SFT), Evals & Testing Agents, Context Engineering
Language & Frameworks- Python, JavaScript, React, Node.js, Solidity (basic), Smart Contract, Agent Frameworks (First Principles), Lang Chain foundations, Reinforcement Learning (RL) Fine-tuning pipelines
Technologies- SQL, Hugging Face, Vector Databases (RAG), LLM Observability & Tracing

PROJECTS

Divinark — AI Agent Reliability & Evaluation Integrity (ongoing)**:** Implemented local LLM inference, coding-agent tool execution, and inference monitoring with execution telemetry and performance analytics.
Investigating AI-agent failure attribution and benchmark reliability through reproducible experiments and execution analysis.
Machine Learning Predictive Analytics: Developed a hybrid demand forecasting system using **LightGBM and statistical models**, analyzing 2M+ transactions across 500 country–category segments to predict monthly sales.
Engineered time-series features, performed **6-fold walk-forward validation**, and deployed an interactive forecasting dashboard using **Python, FastAPI, React, and Docker**.
Entangled Notebook: Developed a personal blog leveraging React and GitHub Pages to host 3+ research articles on AI trends and Quantum Physics.Authored detailed explainer on the Block Universe and Entanglement, simplifying complex scientific theories for a non-technical audience.
Divinark_vc: Built a video conferencing platform using React and Node.js, supports over 15 concurrent users in a single session.
Improved user navigation by designing custom categories and dedicated channel pages for better content management.

EXTRA-CURRICULAR ACTIVITIES

- Founded and scaled Divinark, delivering diverse client solutions across industries.
- Recognized for innovative project designs in IoT and blockchain applications.
- Mentored junior developers and interns in web development and project management.
- Organized coding workshops and hackathons during undergraduate studies.
